**Member
Advisory
Council**

Get Involved

Building a core group of informed and engaged cooperative members is essential to our continued success. During their two-year term, our Member Advisory Council (MAC) members learn about the cooperative's mission, programs and operations. The council also provides ideas and feedback to the cooperative.

EXPECTATIONS

You may be asking, what exactly are the expectations of this group? The answer is...we simply want your candid feedback on any issues that are brought before you during your two-year term. Information about FMCS, the electric utility industry and the challenges we face will be shared with you. In turn, MAC members are encouraged to share this knowledge with others in your service area. You will also be asked to share your perceptions, concerns and ideas with our staff. We want you to serve as a valuable sounding board and help determine priorities in our strategic planning.

MEETINGS

The below meetings are scheduled during the two-year term. Additional gatherings may be planned to receive your valuable feedback.

- ◆ Welcome Meeting
 - Spring of first year
- ◆ Power Plant Tour
 - Fall of first year
- ◆ Economic Development Tour
 - Spring of second year
- ◆ Final Meeting
 - Fall of second year

Economic Development and Solar Energy were topics of interest during the MAC members' 2014 area tour.
